DagSnap 🚀 : Launch Plan

Yes, we intend to launch our project on the mainnet and also open source it to contribute to the Constellation ecosystem.

Future Plans for DagSnap 🚀

1. **MainNet Launch 🌐**:

   - Transition DagSnap to Constellation's MainNet, ensuring full compatibility with live DAG tokens.

2. **New Features 🪄**:

   - Add support for additional DAG tokens and enhance transaction functionalities.

3. **Testnet Deployment**:

   - **Testing**: Deploy DagSnap on a testnet to identify and fix any issues.

   - **Feedback:** Collect user feedback to refine and improve the Snap before MainNet launch.

4. **UI/UX Improvements 🎨**:

   - **Refinement**: Optimize UI/UX based on testnet feedback to enhance user experience for the MainNet version.

5. **Publishing and Support 📚**:

   - **Publish Snap**: Release DagSnap on the MetaMask Snap store for public use.

   - **Documentation:** Provide comprehensive guides and support resources for users and developers.

   - **Open Source:** Make the code open source

Technical Support Needed 🛠️

1. **Integration Help**:

   - Assistance with MainNet and integrationnet deployment.

2. **API Stability**:

   - Ensure smooth operation of `dag4.js` and related APIs on MainNet.

3. **Community Feedback & Promotion**:

   - Engage with the community to gather feedback and promote the Snap.

4. **Security Audits 🔒**:

   - Conduct security audits for the Snap, particularly focused on wallet creation and management. We would need support to ensure a thorough review.

5. **Regulatory Compliance**:

   - Assistance in ensuring the app complies with all relevant crypto regulations.
